

In the specifications:

A¹ 1. Please replace the section heading on page 11, line 9, presently reading
"~~Detailed Description~~" with a section heading reading "Brief Description
of the Drawings".

A² 2. On page 11, line 24, between the line beginning with "Fig. 7" and the
line beginning with "Drilling machines employ", please insert a section
heading reading "Detailed Description".

3. On page 6, line 2, please delete the second word [the], between the word
"The" and the word "injection".

4. Please amend the abstract as follows:

A³ A drill head capable of attachment to a drilling machine for insertion of rock
bolts into rock strata. ~~the~~ The drill head comprising: a base block ~~including~~
~~means adapted~~ to facilitate attachment to the drilling machine; ~~means for~~
~~driving a spindle~~ driving spindle mechanism having a member at one end
which receives a proximal end of a rock bolt including an internal cavity; an
injection assembly including at least one internal passage for retaining a
grouting compound; ~~wherein, when~~ When the rock bolt is inserted in the
member and when the injection ~~member assembly~~ engages ~~said the~~
member, the ~~at least one~~ passage is in communication with ~~said the~~ internal
cavity in ~~said the~~ rock bolt; whereupon the injection assembly operates to
inject a predetermined quantity of the grouting compound into a bolt hole in
the rock strata via ~~said the~~ internal cavity of the bolt.
